Tameside Radio is a contemporary radio station, playing a relaxing mix of music and best new hits from iconic artists across the years.

We offer a range of campaigns to suit all marketing budgets, from medium and heavy weight schedules to bespoke, shorter and more intense event promotion.

Radio Advertising is an effective, low-cost medium through which your business can reach a target consumer. Radio creates emotional reactions with its listeners, and, in turn, consumers perceive your advert as being more relevant to them personally. This leads to increased market awareness, sales, and footfall from market traders to financial directors who could be humming the name of your brand.

What results you can expect from radio advertising:

Radio builds relevance and trust

Radio advertised brands feel more relevant and are much more trusted by radio listeners.

Boosting awareness and consideration

Listeners are, on average, 48% more aware of companies that have advertised on the radio and 12% more likely to consider them when buying.

Increasing response online

Radio boosts online brand browsing by an average of 52%. Results are immediate, with over half of responses generated within 24 hours of hearing the advert.

Getting a return on your investment

According to analysis from over 500 campaigns, radio pays back £7.70 in increased revenue for every pound spent – second only to TV overall, and highest in product categories where advertising is used to drive immediate results e.g. retail, finance, travel and automotive. AREA MADE
