

Hi

We are your neighbours at _____.

During this time of uncertainty we are here to help. We would be happy to do some grocery shopping for you (we'd leave it by your door and you could refund us later) or run errands if you are concerned about going outside, are self-isolating or should you become poorly and need help.

We will keep an eye on your house as we pass by, but if you could fold and tape the attached to one of your front windows it will help. If we see green we will know that you are ok, but if we see red we will know that you need something and we will contact you or get help.

Equally, if you happen to see a red sign in a neighbour's window, please let us know if you can't help yourself.

Our numbers phone number(s) are < >
