

The Cherry Group Collection

Elevate your living space

Welcome to the Cherry Group's collection of home improvement solutions designed to transform your house into the dream home you have always envisioned. Within these pages, you will discover our selection of carefully curated solutions and suppliers that blend quality craftsmanship with innovative design.

Our collection of windows and doors presents the ideal blend of style, security, and energy efficiency. From classic sash windows that maintain traditional charm to contemporary bi-fold doors that effortlessly connect indoor and outdoor spaces, each product is designed to improve both the aesthetics and functionality of your home.

Transform your living experience with our carefully designed modular extensions. Whether you're looking for a spacious kitchen for family gatherings, a bright dining area, or extra bedrooms for a growing household, our extensions blend seamlessly with your existing structure while maximising space and natural light.

Experience tranquility in our garden rooms, versatile retreats that introduce new possibilities to your outdoor space. Ideal as a home office, creative studio, or relaxation sanctuary, these elegantly designed structures expand your living area while ensuring a harmonious connection with nature.

Every project starts with comprehending your vision. Our approachable team is dedicated to outstanding craftsmanship and meticulous attention to detail, ensuring outcomes that surpass expectations and contribute lasting value to your home.

Explore the possibilities. Your journey to a more beautiful, functional home starts here.

Your home transformation begins here

Step into our immersive showroom, a space designed to be the starting point where your home improvement dreams take shape. Far more than a simple retail floor, our expansive display area serves as a curated journey through a world of possibilities. Each section is thoughtfully arranged to bring our home transformation solutions to life, helping you visualise how premium craftsmanship can elevate your daily living experience.

In our windows and doors gallery, we move beyond small samples. Here, you will find full-size installations that invite interaction, allowing you to feel the material quality, test the effortless glide of our sliding systems, and appreciate the robust security of our entry doors. This hands-on environment ensures you can verify the tactile excellence of our products before they ever arrive at your home.

As you explore, you can compare a diverse palette of frame materials, high-performance glass, and bespoke hardware finishes. To help you navigate these choices, our on-site specialists provide live demonstrations of our advanced technology.

From sound-dampening glass to thermal frames, we show you exactly how our energy-efficient features stabilise your indoor climate, enhance comfort, and provide long-term savings on your energy bills.

Step into our Leka Xi Extension, where you can appreciate the marriage of contemporary style and innovative design. This immersive space allows you to explore the layout and quality finishes, making it easy to imagine how a Leka Xi can enhance your lifestyle, whether as a seamless home extension or a versatile garden room.

Throughout the showroom, material and finish samples are carefully organised to inspire your creativity. This tactile approach enables you to develop cohesive design schemes that transition smoothly from your existing home into your new living area, ensuring a perfect aesthetic match and removing the guesswork from your renovation.

Our design consultants are perpetually available yet never intrusive, prepared to provide expert guidance or technical specifications whenever required. They help you navigate the Leka system without pressure, ensuring your project starts with absolute clarity. Your perfect home awaits; experience it first in our showroom.

Showroom Opening Hours

Monday to Friday: **09:00–16:00**

Saturday: **09:00–14:00**

Evening appointments are also available by request, simply email info@cherrygroup.uk with your preferred date and time.

Windows and doors that transform your home

At the heart of every beautiful home are thoughtfully designed windows and doors that define both character and comfort. Our collection of brands and suppliers represents the perfect fusion of timeless design, state-of-the-art technology, and superior craftsmanship, offering solutions that enhance your living experience.

Windows that welcome light and life

Our window collection encompasses a diverse range of styles, each precision-engineered to enhance various aesthetics while providing exceptional performance. Traditional casement windows add classic charm to period properties, while sleek UPVC windows frame your views with efficiency.

For those aiming to preserve historical integrity, our sliding sash windows replicate authentic period details while integrating modern thermal efficiency. Alternatively, our contemporary aluminium frames provide slim sightlines that maximise glass area, flooding interiors with natural light whilst maintaining structural integrity even across large apertures.

Each window is available with customisable glazing options and in a range of colours to suit your home's aesthetic. Our energy-efficient double and triple glazing significantly reduces heat loss, lowering energy bills while creating a more comfortable interior environment.

Doors that make a statement

Your front door makes a vital first impression while ensuring security and insulation. Our composite doors merge the aesthetic charm of timber with the durability of modern materials, offered in a range of designs from traditional panelled styles to contemporary minimalist statements. Each door is equipped with multi-point locking systems that surpass industry security standards.

For those seeking to enhance their living area, our bi-folding, French, and sliding door systems provide stunning transitions between indoor and outdoor spaces. Engineered with precision-gliding mechanisms and thermally broken frames, these systems blur the boundaries between home and garden without sacrificing warmth or security.

For the ultimate luxury statement, our panoramic sliding systems, featuring minimal visible framing, create glass walls that appear to vanish, providing uninterrupted views whilst maintaining exceptional thermal performance through advanced glazing technology.

Tailored to your vision

Recognising that every home is unique, we offer comprehensive customisation across our range of suppliers. Select from hundreds of colours to perfectly enhance your property's aesthetic. Discover our extensive hardware collection, which includes everything from authentic period reproductions to sleek contemporary handles in finishes ranging from antique brass to brushed steel.

Technical excellence

What truly distinguishes our windows and doors is the invisible engineering excellence. Our advanced weather-sealing technology guarantees draught-free comfort throughout all seasons. Integrated ventilation systems facilitate fresh air circulation without compromising security. Multi-chambered frames and thermal break technology prevent cold bridging, while warm-edge spacer bars between the glass panes enhance insulation even further.

Installation excellence

Even the finest products require expert installation to function as intended. Our installation teams undergo thorough training and certification, ensuring that your beautiful new windows and doors are fitted with precision that maximises their potential performance.

Lasting assurance

We stand by our products with comprehensive guarantees that encompass frames, glazing, hardware, and installation. Our after-sales service includes maintenance checks to ensure your windows and doors continue to perform flawlessly for decades to come.

From heritage homes needing careful restoration to contemporary architectural statements necessitating innovative solutions, our collection of windows and doors provides the ideal balance of beauty, performance, and durability for your most treasured asset — your home.

British innovation in home improvement

Introducing Liniar

We're proud to partner with Liniar, one of Britain's most innovative manufacturers of uPVC window and door systems. Based in Derbyshire, Liniar exemplifies the finest of British engineering, blending state-of-the-art design with a real dedication to sustainability and quality that perfectly matches our own values.

Designed for the modern home

What sets Liniar apart is their innovative approach to uPVC profile design. Unlike traditional systems that have gradually developed over decades, Liniar's range was created from the ground up to incorporate the latest advances in window engineering technology. This forward-thinking method means homeowners gain products that truly push the limits of what's achievable in home improvement.

Award-winning quality you can trust

Liniar's commitment to excellence hasn't gone unnoticed. The company has received multiple industry awards, including the prestigious King's Award for Innovation – recognition of their pioneering work in developing UK-first products and securing numerous patents. This isn't just marketing talk; it's independent validation of their engineering superiority.

Every Liniar product is fully tested and accredited to leading industry standards for safety and security, providing homeowners with complete peace of mind. Supported by ISO 9001 certification and comprehensive guarantees, you can be assured you're investing in products designed to last.

Sustainability at the core

For nearly thirty years, Liniar has recycled all of its operational waste, ensuring that no PVCu scrap ends up in landfill. This isn't a recent trend – sustainability has been ingrained in their business ethos from the start. Their advanced manufacturing facility in Derbyshire operates to the highest environmental standards, producing energy-efficient products made from recycled materials that are completely recyclable at the end of their life.

This circular approach to manufacturing resonates strongly with today's environmentally conscious homeowners who want to make responsible choices without compromising on quality or aesthetics.

The result?

Windows and doors that not only look exceptional but also provide outstanding thermal performance, helping families cut their energy bills while creating a more comfortable living environment.

In today's climate-conscious world, where every household aims to reduce their

A complete range for every home

Through our partnership with Liniar, we can provide homeowners with an extensive selection of products to enhance their properties. From stylishly designed windows in various styles to sophisticated door systems that combine security with kerb appeal, the Liniar range offers solutions for every architectural need.

Beyond fenestration, Liniar's range includes conservatories, lantern roofs, garden rooms, and outdoor products such as decking, fencing, and cladding. This all-encompassing approach allows us to offer complete home improvement solutions from a single, trusted manufacturer, ensuring consistency in quality and appearance across every project.

The Liniar difference

What truly sets Liniar apart is their unwavering dedication to innovation. Ongoing investment in the latest machinery and tooling, along with a dedicated research and development programme, ensures their product range stays at the forefront of the industry. Recent innovations include their groundbreaking PVCu thermal reinforcements and the Zero190 system, crafted specifically for sustainable building projects.

Your local Liniar experts

As a trusted Liniar supplier, Cherry Group combines their world-class manufacturing excellence with our local expertise and commitment to exceptional customer service.

We understand that choosing new windows and doors is a significant investment, which is why we're dedicated to helping you select the perfect Liniar products for your home, supported by professional installation and aftercare.

When you choose Liniar products through Cherry Group, you're not just buying windows and doors – you're investing in British innovation, sustainable manufacturing, and proven performance that will improve your home for decades to come.

Quickslide

Masters of Traditional Sliding Sash Windows

At Cherry Group, we're proud to partner with Quickslide, West Yorkshire's leading manufacturer of uPVC sliding sash windows and a wide range of high-quality fenestration products. With over 20 years of manufacturing expertise and more than 813,000 windows and doors produced, Quickslide has established itself as an industry leader, blending traditional aesthetics with modern performance and innovation.

Performance that matches beauty

Beneath the traditional look, advanced performance is built in. All Legacy sash windows achieve 'A' energy ratings, significantly lowering energy bills while improving home comfort. PAS 24 security accreditation is available, giving homeowners police-backed peace of mind. Document F compliant trickle vents are subtly incorporated, ensuring ventilation needs are met without compromising the window's appearance.

The extensive selection of authentic woodgrain finishes means homeowners need not compromise on colour choices. Quickslide's advanced colour bonding service can create windows in virtually any colour, including sophisticated dual colourways for internal and external finishes. This flexibility makes Legacy windows suitable for both traditional and modern properties.

The Legacy sash window: Authenticity reimaged

Quickslide's flagship product is their Legacy sliding sash window, widely recognised as the most authentic-looking uPVC sash window on the UK market. What makes the Legacy range stand out is their innovative approach to traditional design.

Unlike standard uPVC sash windows, Legacy models feature fully mechanical joints that replace conventional 45-degree welds with 90-degree joints, achieving the most traditionally styled uPVC sash window design available and maintaining the authentic charm of period properties.

The attention to heritage detail is exceptional. Run-through sash horns provide elegant symmetry and visual interest, while the deep bottom rail ensures proportionate, harmonious dimensions reminiscent of Georgian and Victorian architecture. For conservation areas and heritage properties, Legacy windows now offer a slim 37mm midrail option that enhances sightlines while maintaining traditional elegance – ideal for applications where planning authorities require utmost authenticity.

Quickslide's dedication to detail extends to their heritage hardware range, available in eight stunning finishes to perfectly match any window colour scheme. These decorative sash locks combine security with period aesthetics, ensuring the windows look as authentic as they function.

Beyond sash windows: A complete range

While Quickslide initially gained fame for their sliding sash windows, their product range now covers all fenestration needs. Their uPVC casement and flush casement windows offer modern options for properties that do not require traditional style, while their aluminium window collection features slim sightlines and contemporary looks.

The door collection is equally impressive. The Quick-Glide slide and fold door system offers homeowners seamless indoor-outdoor living, while their aluminium bifold doors, French doors, and sliding patio doors cater to projects requiring maximum light and access. The recently launched ultra-slim aluminium sliding patio door features pre-gasketed knock-in beads, significantly reducing fitting time and increasing installer profitability. For heritage properties, their aluminium heritage doors and AluSpace interior door systems deliver the sought-after steel-look aesthetic without the maintenance drawbacks of genuine steel.

Award-winning manufacturing excellence

Quickslide's dedication to quality is demonstrated by numerous industry awards, including Calderdale Manufacturer of the Year 2023, G22 Award Winner, and Build It Awards Finalist 2024. They hold CHAS accreditation, PAS 24 approval, and UKCA certification, ensuring every product adheres to the strictest industry standards.

With an impressive 98.2% on-time delivery rate and typical lead times of just 2-3 weeks, Quickslide combines quality with efficiency. Their 4.7 Google rating and extensive portfolio of satisfied customers demonstrate their dedication to exceptional service.

Your Quickslide partner

As a trusted Quickslide partner, Cherry Group provides homeowners with access to these exceptional products, supported by our professional installation expertise and dedication to customer satisfaction. Whether you're restoring a Victorian terrace or constructing a contemporary new home, Quickslide's blend of traditional craftsmanship and modern performance achieves outstanding results that boost property value and homeowner satisfaction for many years to come.

Where engineering excellence meets timeless design

At Cherry Group, we're pleased to partner with Origin, a distinguished British manufacturer whose aluminium doors and windows exemplify the highest standards of craftsmanship and innovation. For over 20 years, this family-run business based in High Wycombe, Buckinghamshire, has been setting the benchmark for luxury glazing solutions that elevate homes into architectural masterpieces.

The art of British manufacturing

Origin's heritage is rooted in engineering excellence. Every product is designed, manufactured, and tested in-house at their state-of-the-art UK facility, ensuring complete quality control from start to finish. This dedication to British manufacturing means homeowners benefit from products made to exacting standards, backed by a comprehensive 20-year guarantee – one of the most generous in the industry.

Their dedication to quality hasn't gone unnoticed. Origin has been honoured with the prestigious King's Award for Enterprise, alongside multiple industry accolades including Build It's Best Glazed Doors Winner 2025 and Best of Houzz 2025. These aren't just marketing badges – they're independent recognition of Origin's unwavering commitment to excellence.

A comprehensive range for sophisticated homes

Origin's product portfolio is designed to cater for every architectural vision, offering homeowners an extensive choice across three distinct style collections:

The Soho Style features sleek, modern lines with ultra-slim sightlines that enhance natural light while maintaining structural strength. Ideal for contemporary properties aiming for a minimalist look.

The Gallery Style features versatile designs suitable for both traditional and contemporary homes, offering elegant proportions that complement various architectural styles.

The Georgian Style embodies period authenticity with elegant glazing bars and heritage features, perfect for properties in conservation areas or those aiming for classic British charm.

External aluminium doors: Making an entrance

Origin's door collection is truly comprehensive. Their award-winning bifold doors remain the company's flagship product, offering seamless transitions between indoor and outdoor spaces. The slim aluminium profiles maximise glass area whilst delivering exceptional thermal performance and security.

Their sliding door range features ultra-slim sightlines, with the OS-29+ system delivering industry-leading performance. Their front door collection combines striking kerb appeal with robust security features. French doors, single doors, corner configurations, and even garage doors complete the external range, ensuring every opening in your home can showcase Origin quality.

Windows and internal doors: Complete solutions

Origin's window collection extends their engineering excellence to casement windows, picture windows, French windows, bay windows, gable end windows, and even bifold windows – ideal for servery-style openings or distinctive architectural features. Each window system offers exceptional thermal efficiency, superior weatherproofing, and the slim sightlines that Origin is renowned for.

Their internal door range delivers the same premium quality indoors, offering French doors, single doors, and corner configurations that create stunning room divisions while maintaining light flow throughout your property.

Performance that delivers

Origin products deliver exceptional thermal performance, with many systems surpassing Building Regulations standards. This leads to lower energy bills and greater home comfort throughout the year. Security is just as strong – Origin products are Secured by Design accredited, the police-backed initiative recognising products that meet strict security criteria.

Aluminium's inherent properties make it the ideal material for modern glazing. It's remarkably strong yet lightweight, enabling larger glass panels without compromising structural integrity. It is also fully recyclable, making Origin products an environmentally responsible choice for eco-conscious homeowners.

The Origin difference through Cherry Group

When you select Origin products through Cherry Group, you're gaining more than just outstanding glazing – you're investing in trusted British engineering, supported by comprehensive guarantees and installed by our experienced team. We recognise that Origin products are a substantial investment in your home, which is why we're dedicated to guiding you through every step of the process.

From initial design consultation through to installation and beyond, Cherry Group combines Origin's manufacturing excellence with our local expertise and dedication to customer satisfaction, ensuring your home improvement project exceeds expectations.

REASSURINGLY ROCKDOOR

Since 1997, we've led the way in door design and development, blending an approach in which style and security are given equal importance.

It helps we have an obsession with doors and we've used this to continuously break the norm in the industry, whilst creating a name synonymous with quality.

We have amassed a unique collection of door styles and glass designs to suit the UK market. So, whether you have a traditional town house, a new build or a cottage style home, we've got you covered.

Handling your building work requirements

When transforming your home with new windows, doors, modular extensions, or conservatories, the quality of installation is equally as important as the products themselves.

At Cherry Group, we provide support for minor building work to ensure that your home improvement journey runs smoothly from concept to completion.

Our team offers experience in brickwork, modifications, masonry, and finishing work, all essential for flawless installations. Unlike providers who focus solely on product fitting, we recognise that proper preparation and structural integration are key to your improvements' appearance and longevity.

For window replacements, our experienced technicians evaluate load-bearing requirements, tackle any identified damp issues, and guarantee correct lintel installation before adeptly fitting your selected frames.

Door installations receive the same meticulous attention, with our team managing everything from threshold adjustments to intricate brick and stonework around new openings. For bi-folding or sliding systems, we establish level transitions between indoor and outdoor spaces, incorporating drainage solutions that prevent water ingress during adverse weather.

Our modular extension installations demonstrate our wide-ranging capabilities, encompassing everything from groundwork and foundation preparation to precise brickwork and roofing. Our electricians and plumbers seamlessly integrate heating, lighting, and power needs, creating comfortable spaces that can be enjoyed throughout the year.

Throughout each project, our team upholds stringent quality control while liaising with other tradespeople to minimise disruption to your household.

We ensure adherence to all building regulations and conduct the required inspections, providing thorough documentation upon completion.

Our approach reduces the stress of managing multiple contractors, providing you with a single point of responsibility for your entire project.

Ecorooms

Expanding your living space

At Cherry Group, we believe that your home should evolve with your changing needs. Our collection of garden rooms, modular extensions, and warm conservatory roofing solutions offers the perfect balance of innovative design, superior craftsmanship, and sustainable building practices, allowing you to expand your living space with minimal disruption and maximum enjoyment.

Warm conservatory roofing

Many homeowners discover that their stunning conservatories are often unserviceable for large parts of the year, too hot in the summer, too cold in the winter.

Our warm roof conversion system tackles this issue by replacing outdated glass or polycarbonate roofing with our thermally efficient solid roof solution.

This transformation creates a comfortable space suitable for use throughout all seasons while lowering energy costs. The lightweight yet sturdy construction generally requires no additional structural support, making installation simple and economical.

Externally, select from slate-effect finishes or contemporary tiles in a variety of colours to enhance your home's aesthetic. Internally, our vaulted ceilings with integrated LED lighting foster an airy, spacious atmosphere, while optional roof windows or lanterns help to maintain natural light levels.

Reimagining your home expansion

Our Leka modular extension system revolutionises the traditional approach to home expansion. By using a precision-engineered system, we deliver exceptional quality control while dramatically reducing on-site construction time.

By utilising the innovative Leka Xi modular system, we can extend your home with a lightweight, insulated material that features impressive, energy-efficient structures fully compliant with UK Building Regulations.

This approach generally shortens project timelines by 60% compared to conventional building methods, whilst minimising dust, noise, and disruption to your home.

Our team collaborates closely with you to create extensions that blend seamlessly with your existing home, whether you're enlarging your kitchen into a magnificent open-plan living area, adding an accessible ground-floor bedroom, or developing a multi-room rear extension that enhances your living experience.

Garden rooms: Your perfect retreat

Our garden rooms provide versatile, fully insulated spaces that convert your outdoor area into a practical extension of your home. Designed for year-round use, these standalone structures offer the ideal solution for those seeking extra space without the complications of traditional extensions.

Each garden room is precision-engineered to ensure exceptional thermal efficiency, minimising energy consumption while maintaining comfortable temperatures in every season. From sleek contemporary designs featuring floor-to-ceiling glazing to more traditional styles that enhance period properties, our garden rooms can be customised to suit your specific aesthetic preferences.

Whether you're designing a professional home office, a serene yoga studio, a creative workshop, or an entertainment area, our designs integrate practical features such as built-in power, lighting, internet connectivity, and climate control systems. With minimal groundwork needed and typical installation times of just 2-3 weeks, your new space can be ready for enjoyment with remarkable speed.

The Cherry Ecoroom difference

What truly sets our approach apart is our commitment to turnkey excellence. From the initial design consultation through planning permissions, building regulations compliance, construction, and final touches, we oversee every aspect of your project with meticulous attention to detail.

Our installations meet or exceed current building regulations concerning thermal efficiency, ventilation, and structural integrity. We utilise sustainable materials whenever possible, including responsibly sourced timber and recyclable components, while our energy-efficient designs assist in reducing your home's carbon footprint.

Every Cherry Ecorooms project includes extensive guarantees that encompass structural components, weatherproofing, thermal efficiency, and craftsmanship, providing you with total confidence in your investment for years to come.

Transform your living space with Cherry Ecoroom, where innovation meets excellence in every expansion project.

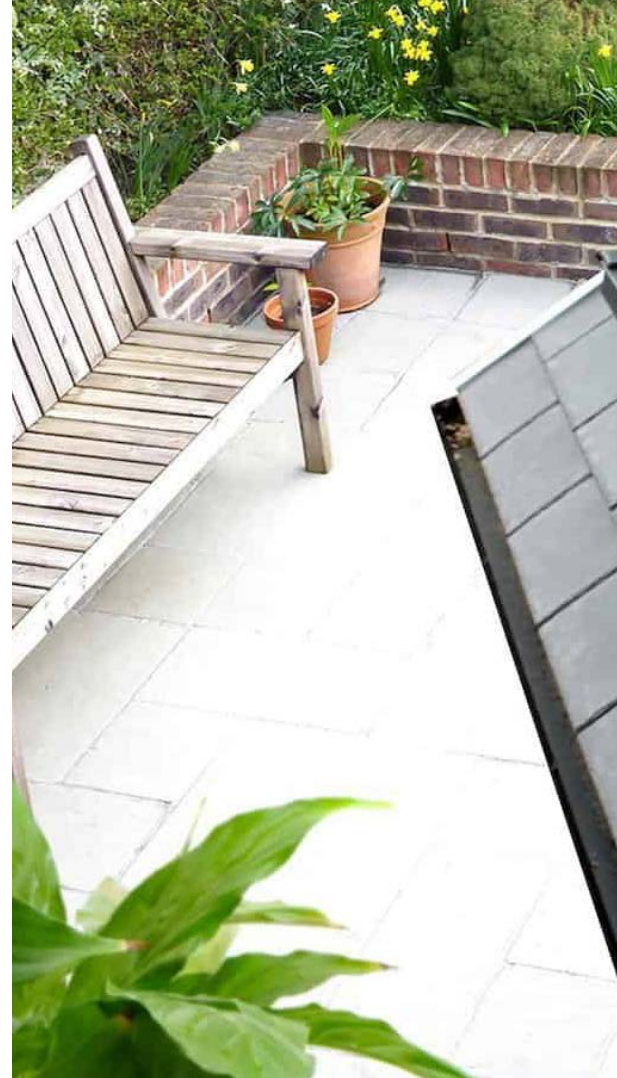

Engineered for Excellence

The lightweight Leka Roof has been designed to outperform as well as outlast common glass and polycarbonate roofing systems. It's so good it has been approved by an independent building control body, an approved building inspector licenced by the Government, and our patented technologies lead the way for innovation in the industry.

Leka are proud to offer an industry leading U value from 0.10. The closer a U value is to 0 the better a conservatory insulated roof is. Our conservatory warm roof is one of the most thermally efficient on the market.

We do not brand the new LEKA System as a lightweight roofing system without having the facts to back it up, whilst other products/materials actually weigh nearly double that of a traditional glass conservatory roof.

Leka Roof

Removing the usual need for an outer plywood or OSB material which again is open to deterioration over a period of time, and replacing with the new LEKA structural, 100% weatherproof, lightweight and insulated boarding system reduces the overall weight of the roofing system and improves the overall U values of the finished product.

Lightweight slate or shingle tiles complement the Leka roof finish and come in a range of colours.

With innovative products throughout and combining insulated sheets with PIR insulation the LEKA system has **less elements to install onsite** which speeds up your installation timings with average installation only taking 2-3 days including removal of your old conservatory roof.

Glass reinforced plastic

Using **GRP or glass reinforced plastic** allows a structurally tested, lighter alternative to aluminium and timber when providing the main structural roof rafters. GRP is not at risk of sweating /condensation or cold bridging like aluminium. Nor is GRP open to wood worm, moisture absorption or potential rotting such as timber.

Leka insulated internal finishing boards replace the need for heavy insulated plasterboards often used by our competitors as the internal finish prior to plastering. This innovative board is a third the weight of a standard plasterboard and extensively lighter than heavy insulated plasterboards.

For a more traditional cost-effective finish, standard 12.5mm plasterboards can also be utilised as part of the Leka ECO range which (in most cases) doesn't affect our exceptional U values.

Average Leka system roofs weigh within 10-12% of a traditional glass conservatory roof which allows (in most cases) your existing conservatory frames to take the weight of your new Leka roofing system.

Having a load bearing structural insulated and weatherproof outer sheet allows the use of less roofing bars and so our roof bars can be spaced further apart which reduces weight and also improves energy efficiency levels.

Introducing the Leka Xi

The Leka Xi is a revolutionary game changer in the home extension market.

It's a warm, sustainable alternative to a traditional block/brick built conservatory or home extension.

Typically installed on concrete pads or structurally tested ground screws, the Leka Xi saves time, mess and stress when considering a new build conservatory or single storey extension.

Whether you're upgrading an outdated design or building a brand-new conservatory, Leka Xi offers unparalleled quality, performance, and style.

Why Choose the Leka Xi Conservatory System?

Insulated for Year-Round Comfort

Say goodbye to overheating in summer and freezing temperatures in winter. Our energy efficient extensions feature cutting-edge insulation, keeping your space cosy and comfortable all year round.

Quick and Hassle-Free Installation

Unlike traditional builds, the modular Leka Xi system is designed for rapid installation with minimal disruption. You'll enjoy your new conservatory or extensions sooner and with less mess and stress.

Aesthetically Versatile Designs

From sleek modern styles to classic extension aesthetics, Leka Xi is customisable to suit your taste and complement your home.

Compliant and Reliable

Fully compliant with UK Building Regulations, our system guarantees quality, safety, and long-lasting performance.

Typically, ground screws and a complete Xi bespoke home extension are installed in days, not weeks. No thermal bridging or moisture absorption due to our GRP lightweight, structurally sound framework. Thermally efficient to building regulation standards. Highly engineered, pre-fabricated modular sections, creating comfort that every part of the Xi has been factory tested before delivery. The Xi revolutionises the building market and provides homeowners with multiple benefits.

1

Modular Base System

Our advanced conservatory base system is the perfect foundation for your new or upgraded conservatory, ensuring a stable, insulated base that minimises heat loss.

2

Prefabricated Components

Precision-engineered components are manufactured off-site for quick and seamless assembly.

3

Professional Installation

Our expert installers bring your vision to life with minimal disruption to your home.

The Xi is not restricted to size or design and if you can think it, we can build it.

The GRP cladding skins come in a range of colours and offer a sustainable replication of either real brick work, stone or timber. We can even supply external boarding, immediately ready for a plasterer to render directly to.

The UK market is moving away from traditionally built home extensions due to several reasons:

1

The cost of building materials continues to escalate.

2

Labour costs continue to escalate.

3

Thermal efficiency requirements are struggling to meet the ever evolving UK building regulations landscape.

4

Sustainability is playing a huge role in how buildings are constructed.

5

Labour shortages continue to drive increased project lead times.

6

Mess and stress of having works undertaken on a property.

The future of outdoor living

At Cherry Group, we are proud to partner with Leka Xi Garden Rooms – innovative composite garden buildings that transform outdoor living spaces. As part of the leading Leka Systems Group, Leka Xi represents the most advanced solution on the garden building market today, blending state-of-the-art engineering with striking aesthetics to craft spaces that truly elevate your lifestyle.

Built for life: 100% Composite construction

What makes Leka Xi unique is their innovative approach to construction. Unlike traditional garden rooms that depend on timber frames prone to rot or metal structures vulnerable to condensation, Leka Xi garden rooms use 100% composite construction with advanced GRP (Glass Reinforced Plastic) components. This results in no timber, no metal, no rot, no rust, and crucially, no condensation problems that affect conventional garden buildings.

This innovative construction method creates garden rooms designed to last a lifetime, supported by an outstanding 40-year warranty on structural parts – a proof of the manufacturer's confidence in their engineering quality.

Thermal performance that delivers year round comfort

Leka Xi garden rooms feature industry-leading U-values that surpass standard building regulations for walls, roofs, and floors. This outstanding thermal efficiency allows homeowners to comfortably use their garden room in every season, whether as an insulated garden office, home gym, creative studio, games room, or tranquil retreat.

The secret lies in the engineered layers. Structurally tested GRP framework provides water-resistant, lightweight, and thermally efficient foundations. Lightweight external Leka lining boards offer robust, moisture-impermeable protection. High-grade insulation ensures consistent year-round comfort. Together, these components create living spaces that significantly reduce energy costs while maintaining comfortable temperatures in any weather condition.

An impressive 98% of customers report noticing the superior thermal performance of their Leka Xi garden room – real-world validation of the engineering excellence behind every installation.

Built in days, not weeks

Leka Xi's factory-assembled modular system transforms the installation process. Each garden room is precisely engineered and factory-tested for structural integrity, energy efficiency, and quality assurance before leaving the factory. This ensures no messy on-site construction, no weather related delays, and no compromise on quality.

Working with ground screw foundation partners eliminates the need for concrete bases, reducing mess and lengthy preparation. Ground screws can be installed in just one day, and the garden room is usually completed within 2-4 days. This quick, tidy installation process minimises disruption while delivering excellent results.

Authentic design, modern performance

Leka Xi offers two premium exterior cladding ranges – Frontonio and Solvonio – featuring authentic timber-effect finishes that rival natural wood aesthetics without the upkeep issues. These impact- and weather-resistant cladding systems come in several elegant colour options, including oak, walnut, cedar, and modern dual-tone choices with black accents.

Every detail has been thoughtfully considered. Composite non-slip decking, modern energy-efficient aluminium or uPVC windows and doors, and sophisticated internal finishes combine to create spaces that are both beautiful and highly functional.

Proven track record, exceptional service

With over 10,000 installations across the country, Leka Xi has built a strong reputation for quality and customer satisfaction. An impressive 97% of customers would recommend Leka Xi, while 96% said the entire process far exceeded their expectations. These figures are not just numbers – they reflect thousands of happy homeowners enjoying improved outdoor living.

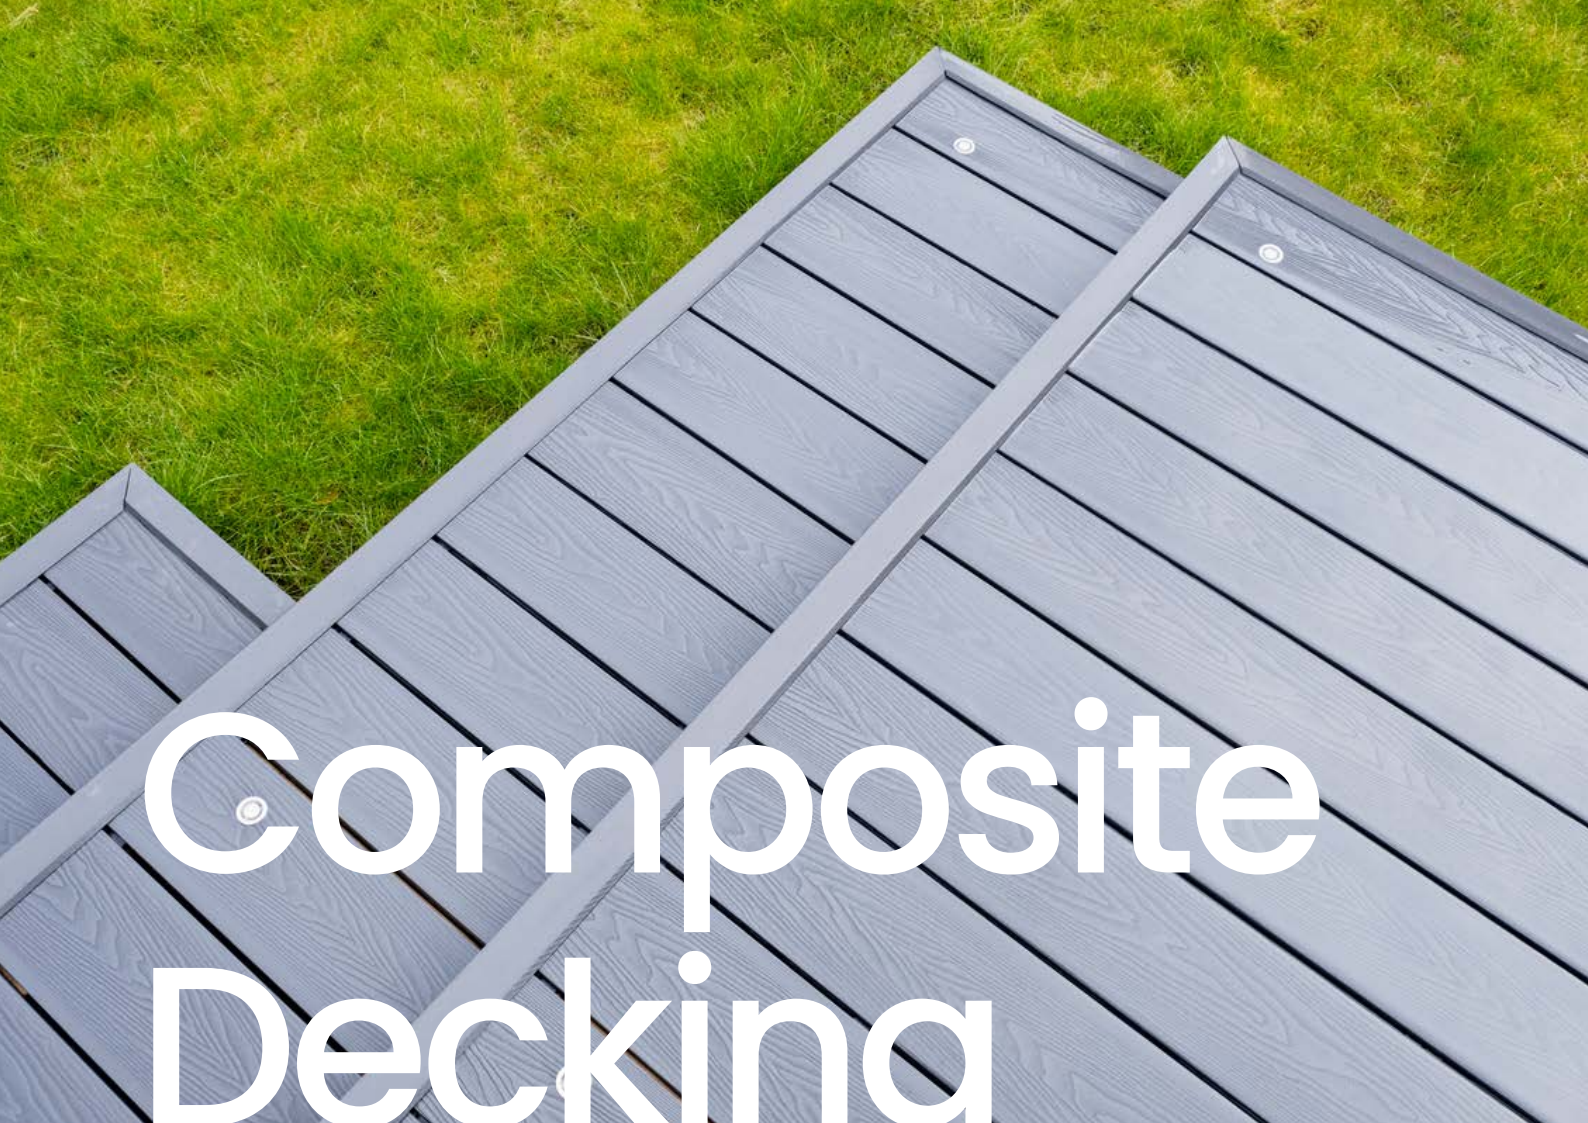

Leka Xi's nationwide installer network guarantees professional service across the UK. Each installer undergoes thorough training at Leka's top-tier facility, ensuring high-quality installations paired with expert local advice and support.

The Cherry Group advantage

As a trusted Leka Xi partner, Cherry Group provides homeowners with access to these exceptional garden rooms, blending Leka's innovative engineering with our dedication to excellent customer service.

Whether you're setting up a home office, gym, studio, or entertainment area, Leka Xi garden rooms offer genuine all-year usability, remarkable durability, and outstanding value that traditional timber or metal alternatives simply cannot rival.

Composite Decking

Transform your outdoor space with composite decking, an innovative alternative that offers the natural beauty of timber without the maintenance headaches. This revolutionary material combines wood fibres with recycled polymers to create a durable, sustainable surface that can withstand the challenges of outdoor living.

Unlike traditional timber decking, which requires annual staining, sealing, and preservation treatments, composite decking is virtually maintenance-free year after year. A simple occasional wash with soapy water keeps it looking pristine, allowing you more time to enjoy your garden rather than maintain it.

The most compelling advantage is its weather resistance. Composite decking will not warp, split, crack, or rot when exposed to the elements. It resists fading from UV exposure, repels moisture without swelling, and stays splinter-free throughout its lifetime—making it ideal for barefoot comfort and safer for children and pets.

Environmental considerations render composite decking particularly appealing to eco-conscious homeowners. Many brands utilise recycled materials in their manufacturing processes, diverting plastic from landfills while decreasing the demand for timber harvesting. Its outstanding longevity further bolsters its sustainability credentials.

Modern composite decking is available in a wide array of colours and textures that convincingly mimic exotic hardwoods such as teak, without contributing to deforestation. Whether you favour the rich hues of tropical timber or contemporary grey finishes, there is a style to enhance any garden aesthetic.

With concealed fastening systems that create clean, uninterrupted surfaces and specialised edging options for a professional finish, composite decking offers a premium appearance that enhances your outdoor living space and adds enduring value to your property.

Composite cladding represents the perfect blend of aesthetics and practicality for modern home exteriors. This innovative material combines the natural allure of timber with advanced polymer technology, creating a protective layer for your property that maintains its beauty with minimal maintenance.

Unlike traditional timber cladding, which deteriorates over time, composite options resist fading, warping, and splitting even in difficult weather conditions. This remarkable durability results in decades of performance without requiring painting, staining, or sealing—significantly reducing lifetime ownership costs while preserving a pristine appearance.

The environmental benefits are equally compelling. Many composite cladding products use recycled materials, thereby minimising landfill waste while creating a product that lasts longer than traditional alternatives. Their excellent insulation properties may also improve thermal efficiency, potentially lowering heating costs.

The versatility of design makes composite cladding suitable for any architectural style. Available in a range of colours, from natural wood tones to contemporary greys and blacks, these panels can provide both subtle refinement and striking visual statements. Various profiles, from traditional weatherboard to sleek horizontal planks, further enhance your creative options.

Installation systems have been designed for simplicity and durability, featuring interlocking designs that create seamless façades while allowing for natural expansion and contraction. This careful engineering, combined with UV-stabilised formulations, ensures that your home retains its kerb appeal for years with minimal maintenance, representing the ultimate blend of beauty and practicality.

Community champions

At Cherry Group, we believe that local sports teams embody the very essence of our community. Our commitment extends beyond mere sponsorship, we have developed our business model to foster meaningful partnerships that enable these teams to flourish both on and off the field.

Through our dedicated sports support initiative, we provide financial backing to several teams across various age groups and disciplines. The teams we support include Beverley Cricket Club, Cherry Burton Cricket Club, Beverley Town Football Club, Driffield Bowls Club, and AFC Tickton Tigers.

Our contributions fund vital equipment, training facilities, and tournament entry fees that could otherwise burden limited team budgets. We also support school sporting initiatives and are the primary supporter of the Get Ahead Partnership in North Lincolnshire.

We measure our success not only by business growth but also through championship trophies, increased participation rates, and the personal development of those whom we support. The testimonials from coaches, parents, and players who have benefitted from our assistance serve as a daily reminder of the profound impact that local sports have on building confidence, teamwork, and community pride.

Spread the cost of your home improvements with flexible finance

At Cherry Group, we understand that many customers may prefer the option of paying with finance, that's why we're proud to be partnered with established credit brokers, Ideal4Finance, to enable you to spread the cost of your purchase with manageable monthly payments.

The following finance options are available, always subject to the lender's assessment:

Fixed finance at 12.9% APR over 36, 48, 60 or 120 months

A deposit may be required, and we will agree the deposit amount with you before you begin the application process.

Ideal4Finance help thousands of people secure finance for their purchases. They use only reputable lenders and are Trustpilot-rated 'Excellent'.

You can apply online or by telephone and decisions are made quickly. The final decision is based on your individual circumstances, including your personal credit profile, how much you want to borrow and the loan period.

A representative example of £5,000 purchase, with a 10% deposit, paid over five years (60 months) at 12.9% APR.

Purchase amount £5,000; deposit amount £500; total credit £4,500; interest rate 12.9% (fixed); loan duration 60 months; monthly repayment £100.54; total repayable £6,032.61; total cost £6,532.61.

* Please note the representative example provides an indication only and the exact details will be provided at the application stage.

There are risks involved in taking out a loan and you should ensure you can make all payments on time and in full; failure to do so can lead to financial difficulties and have a negative impact on your credit score.

If you're ready to apply, visit our website to begin the application process. If you need support with your application, please call Ideal4Finance on 020 3617 4647 (Mon to Fri, 9am to 5pm).
